Setup Guide

- 1 - Plug the Gigaspire into power using the included adapter.
- 2 - Remove main ethernet cable from old router (if applicable)
- 3 - Plug ethernet cable into white port on back of Gigaspire.
- 4 - You can now connect your PC, Smart TV, etc. directly to the back of the Gigaspire using one of the yellow ethernet ports.
- 5 - You can also now connect to wirelessly by going to your Wi-Fi settings on your device and select the network name and entering the password that you set up with your WIN customer service representative.
