

Setup Guide

GigaSpire Router for **WINSPEED**

Get Connected In Just a Few Steps!

Follow the steps below to set up your GigaSpire router and start enjoying fast, reliable WIN service throughout your home.

1

Plug in Power

Plug the GigaSpire into a power outlet using the included adapter.

2

Remove Old Connection

Remove the main ethernet cable from your old router (if applicable).

3

Connect Internet

Plug the ethernet cable into the bottom ethernet port on the back of the GigaSpire (the port with the  symbol).

4

Connect Your Devices

You can now connect your PC, Smart TV, etc. directly to the top three ethernet ports on the back of the GigaSpire.

5

Connect Wirelessly

You can also connect Wi-Fi compatible devices wirelessly by going to the Wi-Fi settings on your device and selecting the network name and entering the password that you set up with your WIN customer service representative.

WINSPEED

LOCAL SERVICE.
INCREDIBLE SPEED.
A **BRIGHTER** TOMORROW.
