

Quick Start Guide:

Setting up your **GigaMesh BLAST u4m** using the **CommandIQ** app.

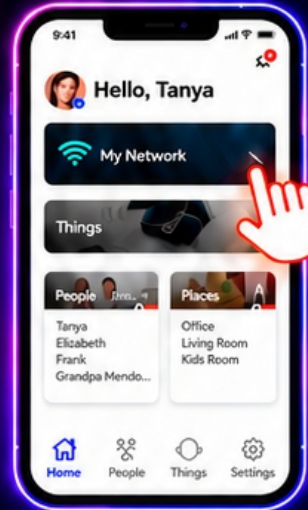

1

Plug your GigaMesh u4m into a power outlet using the supplied power cord.

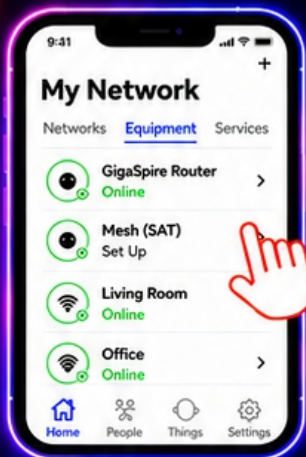

2

Open the CommandIQ App.

3

Next, tap Mesh (SAT) to connect your new system.

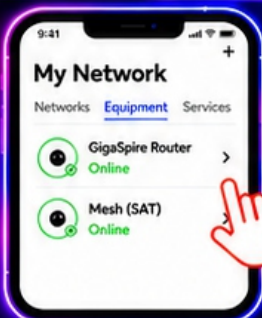

4

Scan the QR code on the bottom of the GigaMesh BLAST u4m.

5

Once complete, you will see your newly added Mesh (SAT) in the Equipment section within My Network.

Tap Mesh (SAT) to see additional details.

The signal strength reading will tell you how strong your signal is.

Pro Tip: You will see Excellent, Good or Weak. Move your mesh closer to your router to improve the signal.
